

## **Net Stable Funding Ratio**

**As on Mar 31, 2023**

The Net Stable Funding Ratio (NSFR) is a significant component of the Basel III reforms. In the backdrop of the global financial crisis that started in 2007, the Basel Committee on Banking Supervision (BCBS) proposed certain reforms to strengthen global capital and liquidity regulations with the objective of promoting a more resilient banking sector. In this regard, the Basel III rules text on liquidity – “Basel III: International framework for liquidity risk measurement, standards and monitoring” was issued in December 2010 which presented the details of global regulatory standards on liquidity. Two minimum standards, viz., Liquidity Coverage Ratio (LCR) and Net Stable Funding Ratio (NSFR) for funding liquidity were prescribed by the Basel Committee for achieving two separate but complementary objectives. The NSFR promotes resilience over a longer-term time horizon by requiring banks to fund their activities with more stable sources of funding on an ongoing basis.

The Liquidity Risk Management of the Bank is governed by the Asset Liability Management (ALM) Policy approved by the Board. The Asset Liability Committee (ALCO) is a decision-making unit responsible for implementing the liquidity and interest rate risk management strategy of the Bank in line with its risk management objectives and ensures adherence to the risk tolerance/limits set by the Board.

The guidelines for NSFR were effective from October 1, 2021. The NSFR is defined as the amount of available stable funding relative to the amount of required stable funding. “Available stable funding” (ASF) is defined as the portion of capital and liabilities expected to be reliable over the time horizon considered by the NSFR, which extends to one year. The amount of stable funding required (“Required stable funding”) (RSF) of a specific institution is a function of the liquidity characteristics and residual maturities of the various assets held by that institution as well as those of its off-balance sheet (OBS) exposures.

Equitas Small Finance Bank Limited (ESFBL) during the quarter ended 31<sup>st</sup> Mar 2023, maintained ASF of ₹26,606 and RSF of Rs. ₹22,026 crores. The Bank’s NSFR as on 31<sup>st</sup> Mar 2023 was at 120.79% as against RBI minimum requirement of 100%.

The table below sets out the NSFR of ESFBL for quarter ended Mar 31, 2023.
